SIMULATORS
Smart And Easy Learning

Teach by visualizing.

RECORD.
ACTION!
EVALUATE.
LEARN.

Customizable, turnkey video recording solutions for education.

ABOUT

Nordic Simulators offers turnkey video recording and debriefing solutions tailored for the needs of a wide range of educational organizations. Nordic CoRecorder software platform is the CoRe of our recording and debriefing product solutions family.

NORDIC CORERECORDER

Easy-to-use, comprehensive fixed simulation recording and debriefing systems for learning environments.

Designed for complete simulation centers featuring multiple training rooms

Centralized on-premise server for software and recordings storage

Nordic CoreRecorder is equipped with:

Browser-based user interface

High-quality fixed and mobile cameras

Wireless and fixed microphones

Voice command system

Recording and debriefing computers

NORDIC CORECMOBILE

Wireless and portable recording and debriefing solution that can be used without external power source

Easy to deploy portable recording and debriefing solution for learning exercises anywhere.

Nordic CoRecMobile is equipped with:

Utilizes the same, intuitive, Nordic CoRecorder –software running on mobile device

Three high-quality, wireless PTZ cameras with built-in microphones and internal batteries. Magnetic and clamp mounts for cameras

Dedicated Wi-Fi router, set of wireless microphones, speaker and headphones

Rugged portable case

NORDIC ENVIRONMENT

Multi-projector videowall that effortlessly creates versatile image and video environments to enhance the realistic experience of exercises.

The Nordic Environment video wall makes it easy to bring your outdoor exercises indoor as an immersive experience. Create a sense of reality with the Nordic Environment image, video and sound environment. Simulation is at its best when the training situation is as authentic as possible. Nordic Environment come with a wide range of pre-recorded sound libraries with easy-to-use audio software.

NORDIC SOUNDBOARD

Nordic SoundBoard is a mobile sound system designed to create background sounds to support simulation exercises. The system is controlled from a tablet that is connected to a Bluetooth speaker.

The hardware includes a wide range of pre-recorded sound libraries. Nordic SoundBoard also allows for the customer to record and play their own customizable sound effects.

NORDIC SERVICES

Consulting - We Are Here to Assist You With Your Simulation Facility Design!

With nearly 20 years of experience in healthcare education, we design functional simulation training facilities tailored to your needs. Our expertise spans various simulation centers worldwide.

Customer and Operational Training

We Will Ensure That You Will Have Certainty on Using Your Simulation Equipment Efficiently

Maintenance and Technical Support

Reliable maintenance and technical support ensure uninterrupted simulation center operation. Regular maintenance can significantly extend the service life of your equipment and keep your training plans on schedule.
